Predictive Maintenance with Decision Economics

August 22, 2026

1 Scope

FD001 RUL and AI4I transfer study; aggregate machine telemetry only.

2 Leakage control

Deterministic engine identities, train-only preprocessing, validation selection, sealed policy test.

3 Decision economics

Illustrative cost units and a complete 27-cell sensitivity surface; no universal savings claim.

4 Limitations

Censored official-test engines receive endpoint RUL metrics only and never policy cost.
